

# Clean Energy Analysis in Hawaii

## Green/Renewable Energies

- Biofuels/Biomass
- Geothermal
- Hydro
- Solar
- Wind

## Why Hawaii?

- Isolated State
- Also Isolated between each island

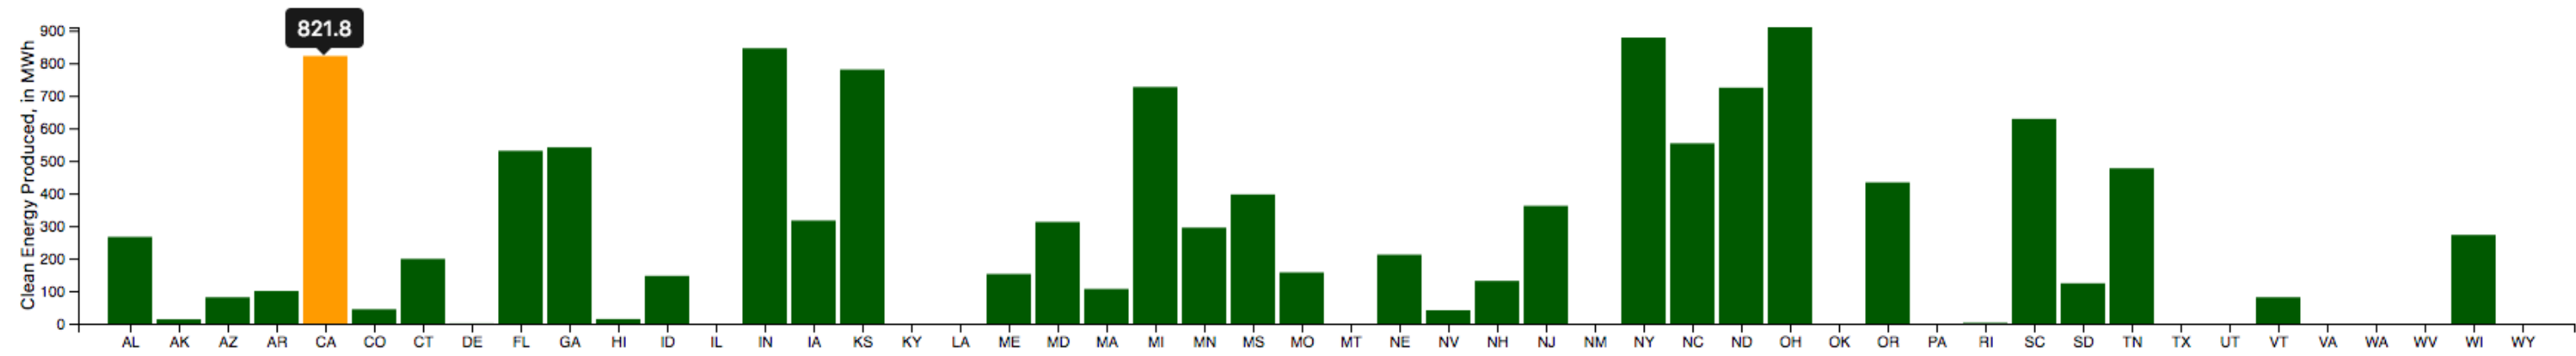

## Goal

- To understand Hawaii use of energy sources and compared to other states
- To see how each island provides sufficient energy to the residents.

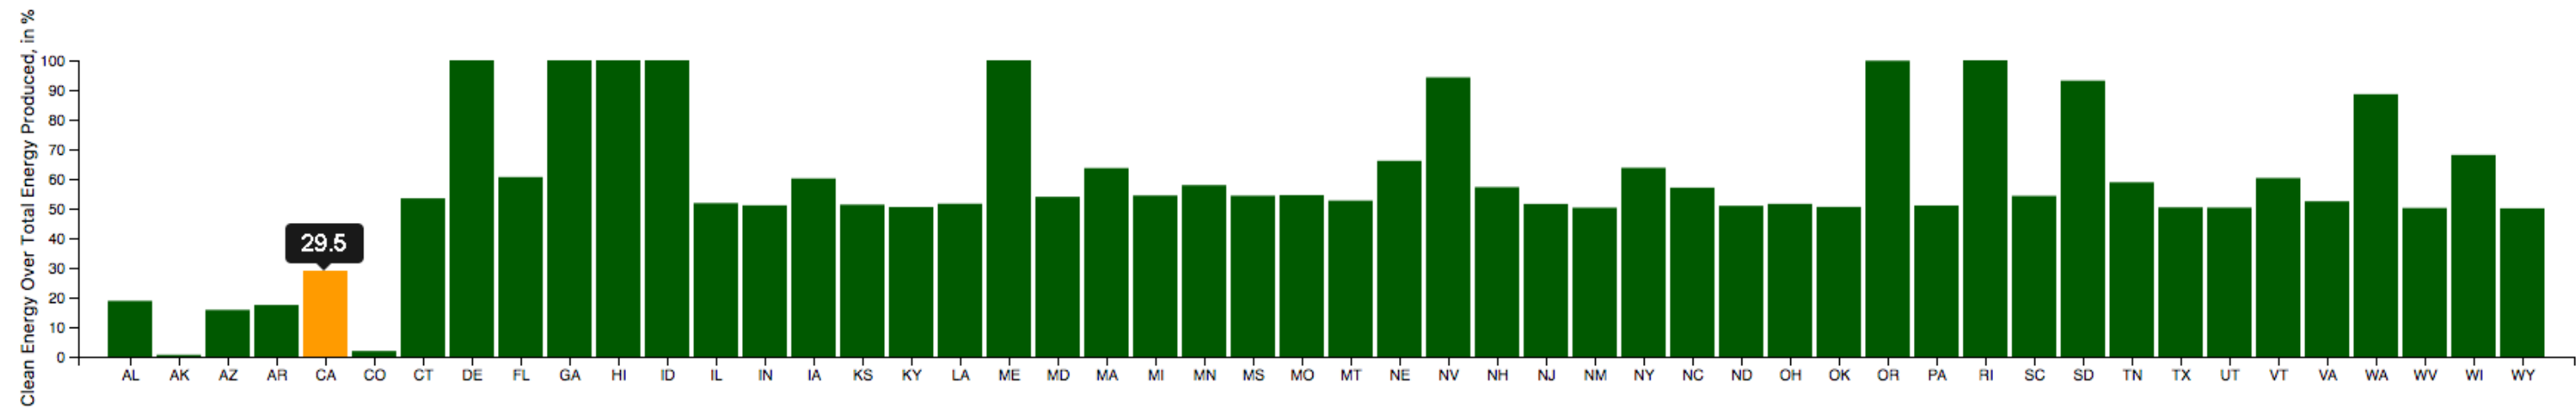

Clean Energy Produced by States

Solar Power   Wind Power   Geothermal Power

# Hawaii Clean Energy Power Plants

# Current Status

## Gathered most of the required data

- Locations of biomass and hydro power plants missing

## Developing

- Color coded themes
- Stronger cohesive layout
- More aesthetically pleasing for all graphs and charts
